

KRASKI DOSKI®

Каталог цветов NCS

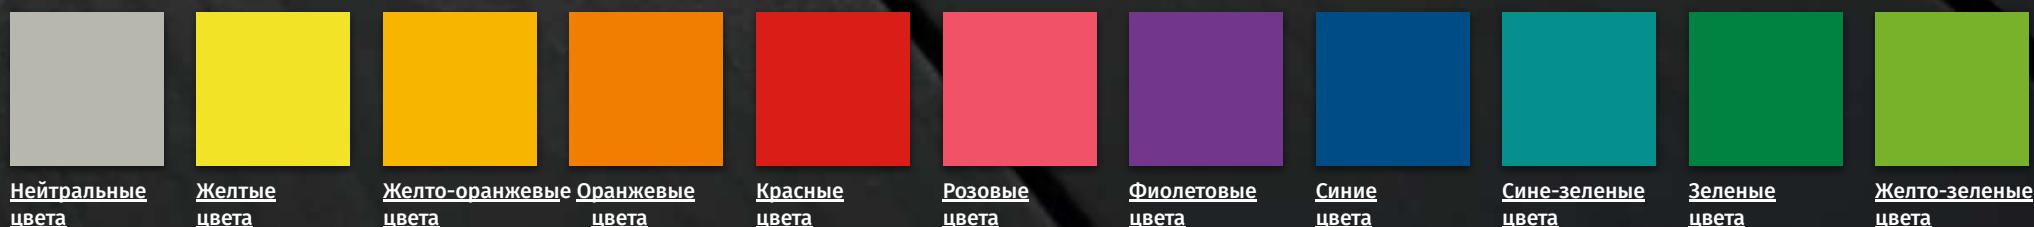

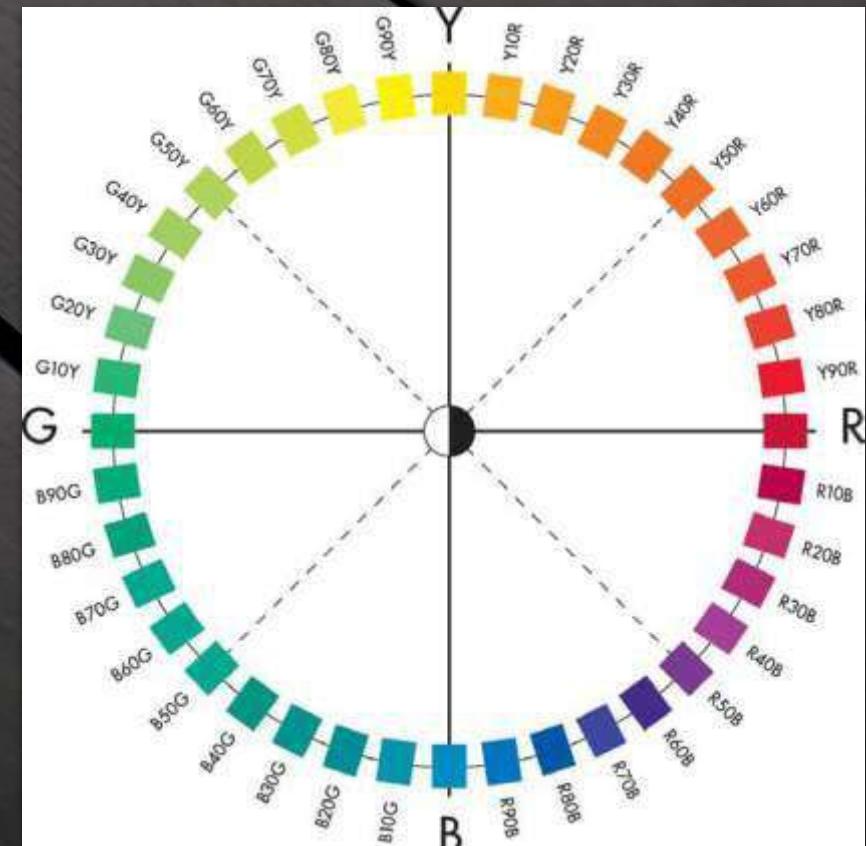

Натуральная система цвета NCS (Natural Color System) – проприетарная цветовая модель, предложенная шведским Институтом Цвета. Она основана на системе противоположных цветов и нашла широкое применение в промышленности для описания цвета продукции. Сегодня NCS является одной из наиболее широко используемых систем описания цветов в мире, получила международное научное признание, а кроме того, NCS является национальным стандартом в Швеции, Норвегии, Испании, и Южной Африке.

Цветы NCS

Система обычно используется для описания и сопоставления цветов, а не смешивания цветов. NCS – единственная система, описывающая цвет так, как мы его видим, поэтому она понятна, логична и проста в использовании. В рамках системы NCS возможно определить любой из миллионов оттенков и дать ему точное обозначение.

При описании цвета по NCS используются шесть элементарных цветов, таких цветов, которые нельзя описать сочетанием двух других (к примеру, элементарный красный – это только красный, без желтого или синего оттенков). Из них четыре хроматических цвета – Желтый (Yellow, Y), Красный (Red, R), Синий (Blue, B) и Зеленый (Green, G), и два нехроматических – Белый (White, W) и Черный (Swarthy, S). Остальные цвета представлены сочетанием элементарных (например, оранжевый – одновременно красноватый и желтоватый). Это сходство называется элементарными признаками цвета (желтизна (yellowness), краснота (redness), белизна (whiteness) и т.д.).

Для удобства использования каталога цветов NCS онлайн, он разделен на 11 цветовых групп. Для просмотра определенной группы необходимо кликнуть на соответствующую иконку ниже данной инструкции. Для того, чтобы вернуться в начало каталога, кликните на кнопку возврата в правом нижнем углу каждого листа.
